

FUND DESCRIPTION

Asset Class
U.S. Stock

Investment Category
Mid-Cap Growth

Objective
Capital appreciation

Strategy
The Fund invests primarily in the stocks of medium-sized U.S. companies. Using fundamental analysis, which considers both qualitative and quantitative factors, the Fund's investment team seeks to identify companies with above-average growth potential, a catalyst for growth in revenues and/or earnings, strong management, reasonable valuations, and strong or improving fundamentals.

DEFINITIONS

Alpha- measures the relationship between the Fund's performance and its beta over a three-year period. Alpha greater than 0.0 means an investment has performed better than the compared index given its level of risk. It can be viewed as a measure of the value added by the Fund manager.

Beta- measures an investment's volatility relative to a market index. The index is equivalent to 1.0. An investment with a beta greater than 1.0 has been more volatile than the index while an investment with a beta less than 1.0 has been less volatile.

Price-to-Book Ratio- is a stock's price divided by its book value, and may help determine if it is valued fairly.

Price-to-Earnings Ratio- is a stock's price divided by after-tax earnings over a trailing 12-month period, which serves as an indicator of value based on earnings.

R-Squared- measures how closely a fund's performance matches (or doesn't match) the performance of its benchmark index.

Sharpe Ratio- divides an investment's return in excess of the 90-day Treasury bill by the investment's standard deviation to measure risk-adjusted performance.

Standard Deviation- measures an investment's historical volatility in performance.
