The performance information shown represents past performance and is not a guarantee of future results. The investment return and principal value of your investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information shown. You may obtain performance information current to the most recent month-end by visiting [seligman.com](http://seligman.com)

Total return assumes the reinvestment of dividends and capital gains distributions, if any. Returns and expenses shown above do not reflect the effect of any sales charges, any other charges or expenses imposed by variable annuity or variable life contracts on their owners or any fees in respect of a pension or retirement plan. If such charges were included, performance would be lower and expenses would be higher. Returns for Class 2 shares reflect the effect of shareholder servicing fees of up to 0.25% per annum.

\*Fund expense ratios are calculated based on the Fund's average net assets during the Fund's most recently completed fiscal year, and have not been adjusted for current asset levels. If adjusted for any decrease or increase in assets, expense ratios would be higher or lower, respectively, than the numbers shown above. The expense ratios include the effect of acquired fund fees and expenses, if any. Please see the Fund's prospectus for a complete list of operating expenses.

**DEFINITIONS**

**Alpha**- measures the relationship between the Fund's performance and its beta over a three-year period. Alpha greater than 0.0 means an investment has performed better than the compared index given its level of risk. It can be viewed as a measure of the value added by the Fund manager.

**Beta**- measures an investment's volatility relative to a market index. The index is equivalent to 1.0. An investment with a beta greater than 1.0 has been more volatile than the index while an investment with a beta less than 1.0 has been less volatile.

**Price-to-Book Ratio**- is a stock's price divided by its book value, and may help determine if it is valued fairly.

**Price-to-Earnings Ratio**- is a stock's price divided by after-tax earnings over a trailing 12-month period, which serves as an indicator of value based on earnings.

**R-Squared**- measures how closely the Fund's performance matches (or doesn't match) the performance of its benchmark index.

**Sharpe Ratio**- divides an investment's return in excess of the 90-day Treasury bill by the investment's standard deviation to measure risk-adjusted performance.

**Standard Deviation**- measures an investment's historical volatility in performance.

Shares of the Seligman Portfolios are offered to separate accounts of participating insurance companies to fund variable annuity and variable life insurance contracts, except the Class 2 shares of the Seligman Communications and Information Portfolio are available to certain qualified pension or retirement plans. If you own or are considering owning such insurance contracts, please refer to the prospectus relating to your variable insurance contract to determine which class of shares is available and for information about charges and expenses imposed by contracts on their owners. If you are a participant in such a pension or retirement plan, you should consult such plan's governing documents or the plan administrator for information about related charges and expenses.

Holdings are shown in descending order of value and exclude short-term holdings and cash, if applicable. Fund holdings are as of the date given, are subject to change at any time, and are not recommendations to buy or sell any security.

**You should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. For a free prospectus, which contains this and other important information about the funds, call 1(800) 221-2450. Read the prospectus carefully before investing.**

The Seligman Communications and Information Portfolio is a narrowly focused sector fund and it may exhibit higher volatility than funds with broader investment objectives. See the Fund's prospectus for specific risks associated with the Fund.

International investing involves increased risk and volatility due to potential political and economic instability, currency fluctuations, and differences in financial reporting and accounting standards and oversight. Risks are particularly significant in emerging markets.
