

FUND DESCRIPTION

Asset Class
U.S. Stock

Investment Category
Large Growth

Objective
Long-term capital appreciation

Strategy
The Fund invests primarily in the stocks of large companies. Using fundamental analysis, which considers both qualitative and quantitative factors, the Fund's investment team seeks to identify companies with above-average growth potential, a catalyst for growth in revenues and/or earnings, strong management, reasonable valuations and strong or improving fundamentals.

DEFINITIONS

Alpha- measures the relationship between the Fund's performance and its beta over a three-year period. Alpha greater than 0.0 means an investment has performed better than the compared index given its level of risk. It can be viewed as a measure of the value added by the Fund manager.

Beta- measures an investment's volatility relative to a market index. The index is equivalent to 1.0. An investment with a beta greater than 1.0 has been more volatile than the index while an investment with a beta less than 1.0 has been less volatile.

Price-to-Book Ratio- is a stock's price divided by its book value, and may help determine if it is valued fairly.

Price-to-Earnings Ratio- is a stock's price divided by after-tax earnings over a trailing 12-month period, which serves as an indicator of value based on earnings.

R-Squared- measures how closely a fund's performance matches (or doesn't match) the performance of its benchmark index.

Sharpe Ratio- divides an investment's return in excess of the 90-day Treasury bill by the investment's standard deviation to measure risk-adjusted performance.

Standard Deviation- measures an investment's historical volatility in performance.
